

FACT SHEET

UPDATED: 11.10.21

PROJECT STATUS

Work on this project began on mid-October 2021 with completion anticipated by mid-January 2022.

Project Hours:

Most of the work shall be conducted at night between 9:00 p.m. and 6:00 a.m., Sunday nights through Friday mornings.

Due to the nature of the work and in consideration of maintaining access to the corridor for the public and businesses, night work is required for the paving, slurry work, traffic loop installation and striping.

Infrastructure installation for the Z-Crossing and ADA compliant pedestrian ramps may be performed during daytime hours of 7:30 a.m. - 3:30 p.m. with right lane closures.

PROJECT BUDGET

The total construction phase cost for the project is \$1,810,400. The construction contract was awarded to Eagle Paving Company in an amount not to exceed \$1,398,000. The project is funded by the City's Pavement Rehabilitation and Overlay Project (CS22A) of the Capital Improvement Program Budget.

North El Camino Real Paving and Striping

ABOUT THE PROJECT

The North El Camino Real Paving and Striping Improvements Project (CS22A) will improve the pavement condition on this heavily used commercial corridor, shift the existing traffic lanes and add green bike lanes northbound and southbound on El Camino Real between Encinitas Blvd. and Olivenhain Road.

The new striping will narrow the existing travel lanes and accommodate new green buffered bike lanes. Green bike lanes allow bicyclists and bike lanes to be more visible resulting in enhanced bicyclist safety at intersections. The number of travel lanes will not be reduced.

In addition, the project includes the installation of infrastructure for a Z-Crossing 350 feet south of Via Molena which will consist of a pedestrian staggered mid-block crosswalk with a pedestrian hybrid beacon to connect pedestrians and bicyclists to the east and west sides of the corridor.

Due to the poor pavement condition between Garden View Road and Encinitas Boulevard, this section of N. El Camino Real requires more robust pavement rehabilitation. If the pavement is not rehabilitated the pavement will continue to deteriorate and result in significant potholes at the most severe failures. Within this segment, all pedestrian ramps will be brought to compliance with the Americans with Disabilities Act (ADA).

The segment between Garden View Road and Olivenhain Road is in moderately good condition and will receive a slurry course. For additional information, please visit the City's [Frequently Asked Questions](#) page.

PROJECT LOCATION AND AMENITIES

Safety and Mobility Enhancements
on El Camino Real from Encinitas
Blvd. to Olivenhain Rd.

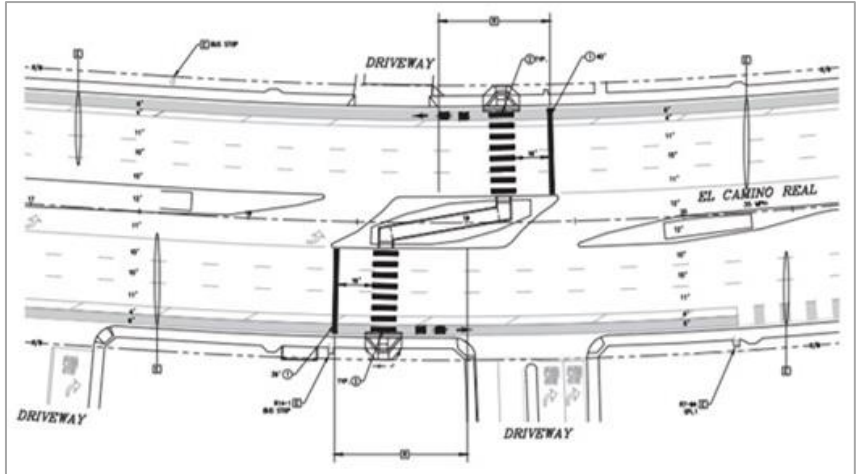

The project is located in the City of
Encinitas in the New Encinitas area.

Project benefits and amenities
include:

- New green buffered bike lanes.
- Infrastructure improvements for a new pedestrian Z-crossing.
- Improved pavement condition from PCI rating of 47 to 100 upon completion.

What to Expect:

- **How will traffic be impacted?**
Minor traffic impacts, with daytime right lane closures.
- **Will there be dust?**
Yes. The contractor is required to minimize dust at all times, but dust is expected during demolition of existing ramps and pavement grinding.
- **Will there be noise?**
Yes, the noise level will be kept to a minimum and within the City's Municipal Code requirements.
- **When will the Z crossing be installed?** Infrastructure will be installed early on during construction with pavement striping completed last.

REVIEW PROCESS

The project design was approved by the Encinitas City Council in April 2021 along with the authorization to advertise for construction bids. The contract award was approved in June 2021. This project is consistent with the City's Active Transportation Plan and is in alignment with the Community Planning vision of the Strategic Plan by providing safe and livable communities through well-maintained infrastructure and facilities. This project meets Goal 4.1 of the City's Climate Action Plan to "Reduce Vehicles Miles Traveled."

CONTACT US

There are a number of ways the community can stay informed about the project throughout construction:

- **Website:** Visit the [city's project webpage](https://encinitasca.gov/Home/City-Updates) for construction updates.
- **Project hotline:** Call 858-500-4540 with any questions and a team member will respond within 48 hours.
- **Email:** Sign up to receive email alerts: <https://encinitasca.gov/Home/City-Updates>
- **Email questions:** Send project questions to: Julie Ballesteros, Project Manager
Development Services Department, CIP Section
